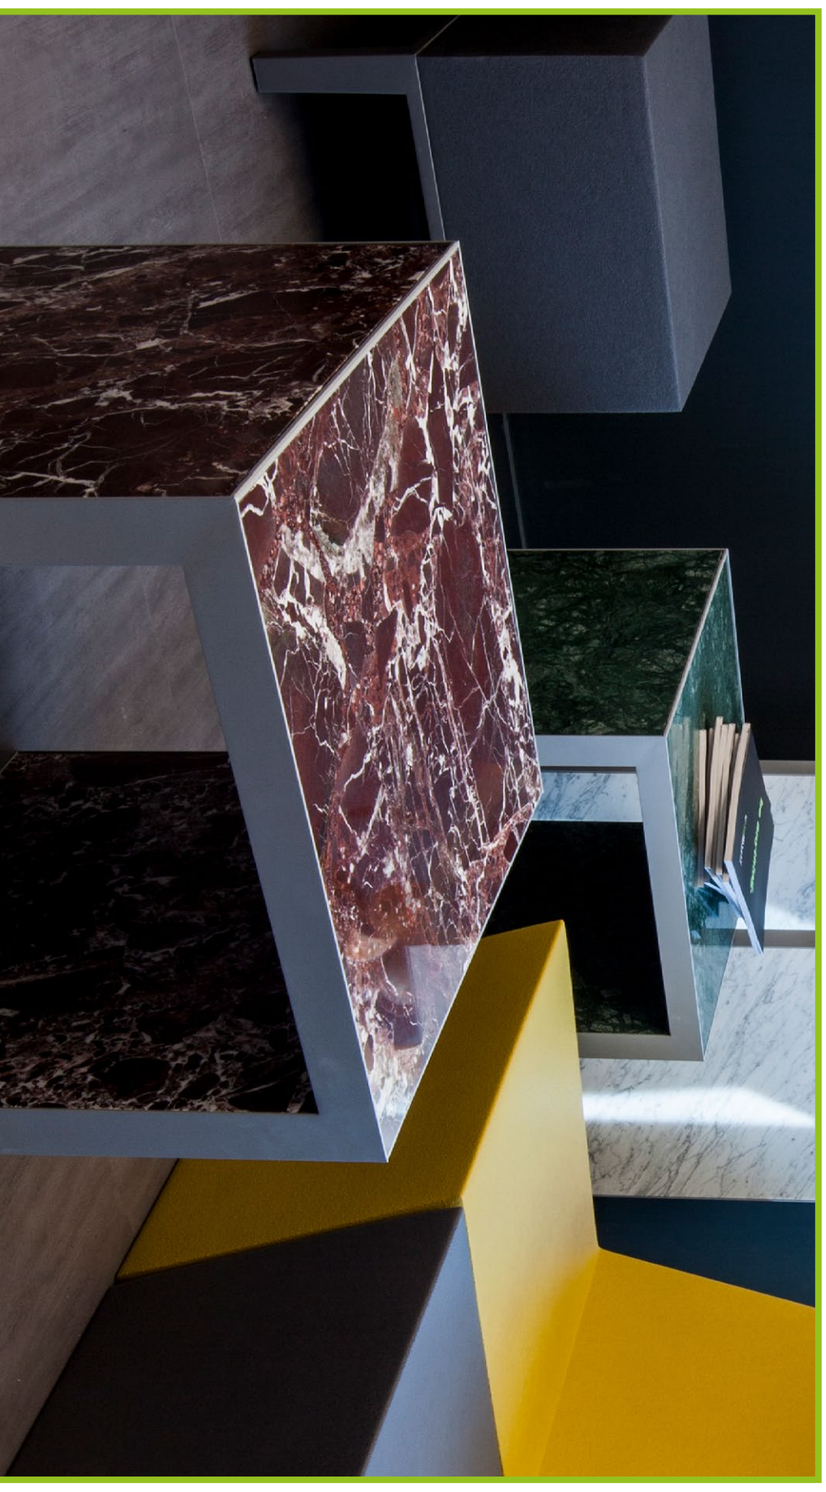
The 8 beMatrix principles **32**

In addition to the versatile beMatrix frame system and its endless options, we now offer iZi-range modular furniture. iZi furniture includes **bars, tables, displays and signage to add that final touch** to your design. The iZi-range boasts the same features as our frame system: it is modular, lightweight, customizable and fast to assemble.

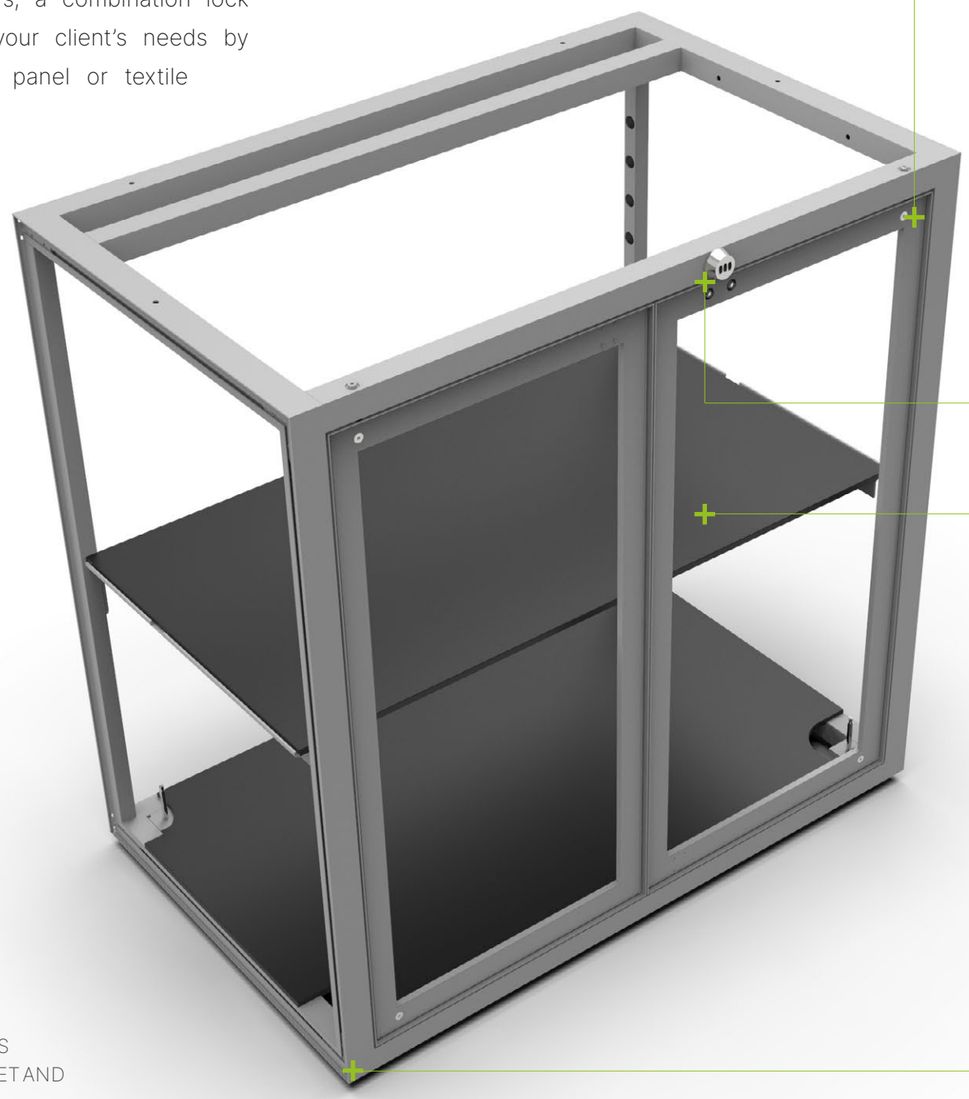


01 Furniture

iZi-bar

Body

The iZi-bar is a stylish and lightweight counter **that can be used as a reception desk, bar or cupboard.** Each iZi-bar comes with shelves, removable doors, a combination lock and adjustable leveling feet. Meet your client's needs by customizing your iZi-bar using hard panel or textile infills.



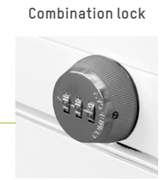
DIMENSIONS: 992 X 620 X 992 MM
STANDARD FINISH: RAL 9006 TEC
AVAILABLE ON DEMAND IN ALL RAL COLORS
ACCESSORIES: 2 SHELVES, ADJUSTABLE FEET AND REMOVABLE DOORS WITH LOCK.

Doors

The **iZi-bar** comes standard with easily removable doors and a combination lock. The combination lock helps insure everything is safely stored and the removable doors mean you can integrate a mi-ni-fridge or other appliances.

Combination lock

A handy combination lock assures everything can be put away safely. No more stressing over losing lock keys.

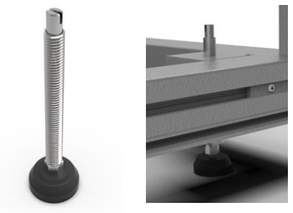


Shelves

The flooring and shelf are part of the standard package. Both are removable and the shelf is adjustable in height.

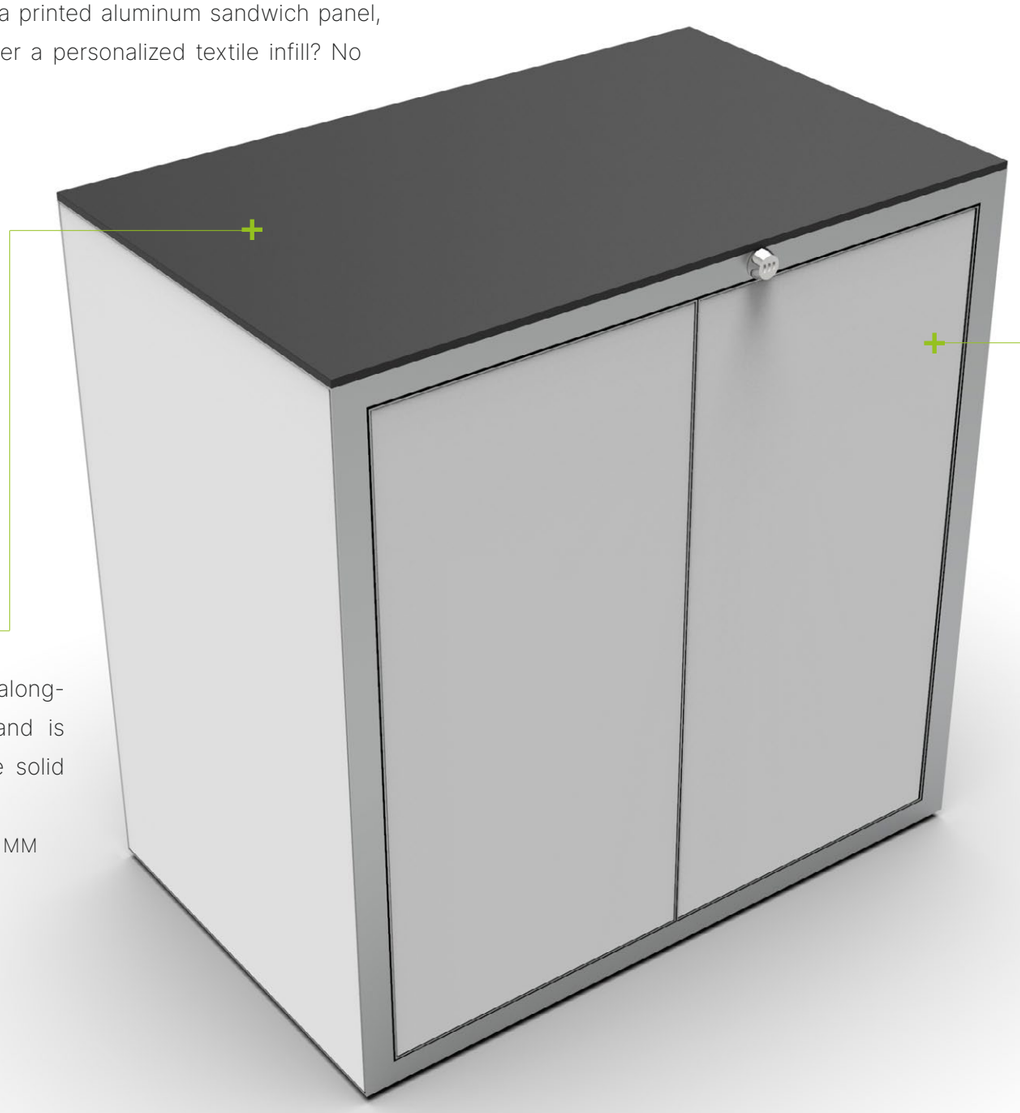
Feet

The 4 leveling feet, are all individually adjustable letting you stabilize the iZi-bar on uneven floors.



Skin

You can finish your iZi-bar any way you like. Would your customer like to integrate a printed aluminum sandwich panel, a blank PVC panel or rather a personalized textile infill? No problem at all.



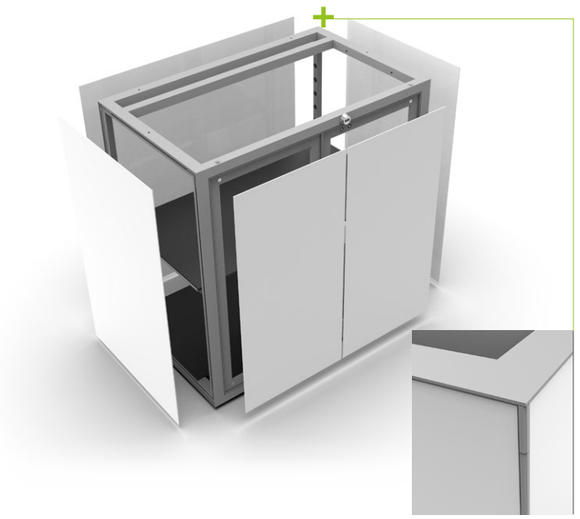
Top

The top can be ordered alongside the iZi-bar “body” and is available as a black/white solid wood panel.

DIMENSIONS: 992 X 620 X 10 MM

Panel

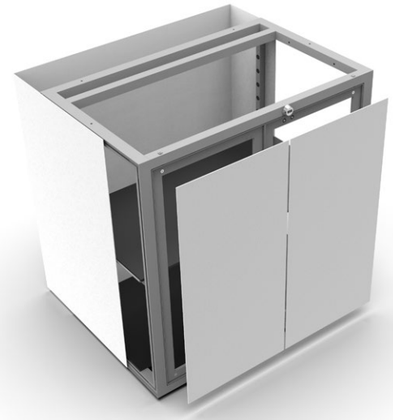
Want an an aluminum infill or PVC panel with a printed design? Prefer to leave it blank? The choice is yours.



Thanks to the miter joint on both front corners of the iZi bar, the sides of the panels remain invisible.

Seamless textile

Cover 3 sides of the iZi bar with a single piece of textile infill for a seamless result. Want to combine iZi bars? This principle can also be applied to several iZi-bars that are joined together.



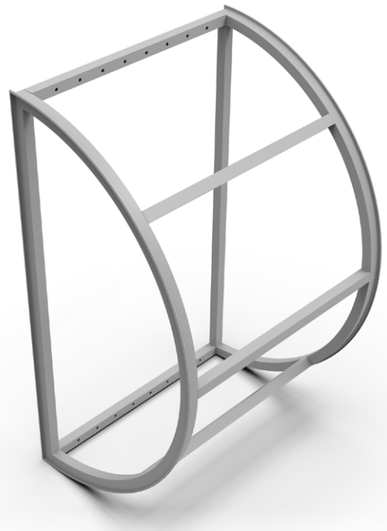
Modular iZi-elements

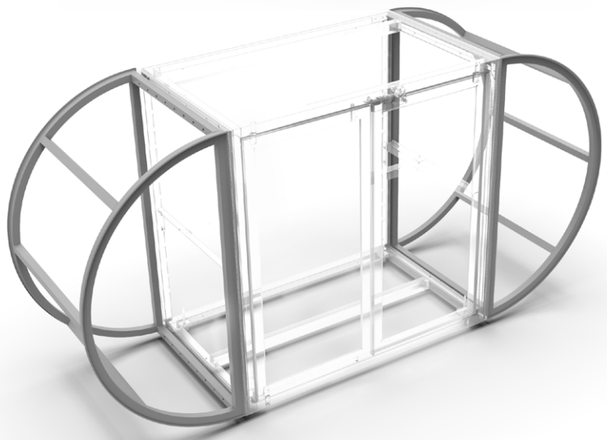
The iZi-range is based on the same DNA as the beMatrix frame system. Modularity and flexibility are pivotal. **Add additional modular elements to change the iZi-bar into different structures** in no time at all.

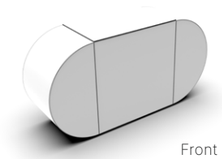
Barfly

Add one or two **barfly** elements to the iZi-bar for a dynamic look. A nice finishing touch without a lot of effort!

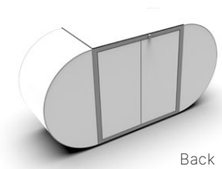
DIMENSIONS: 992 X 620 - R 496
STANDARD FINISH: RAL 9006 TEC







Front

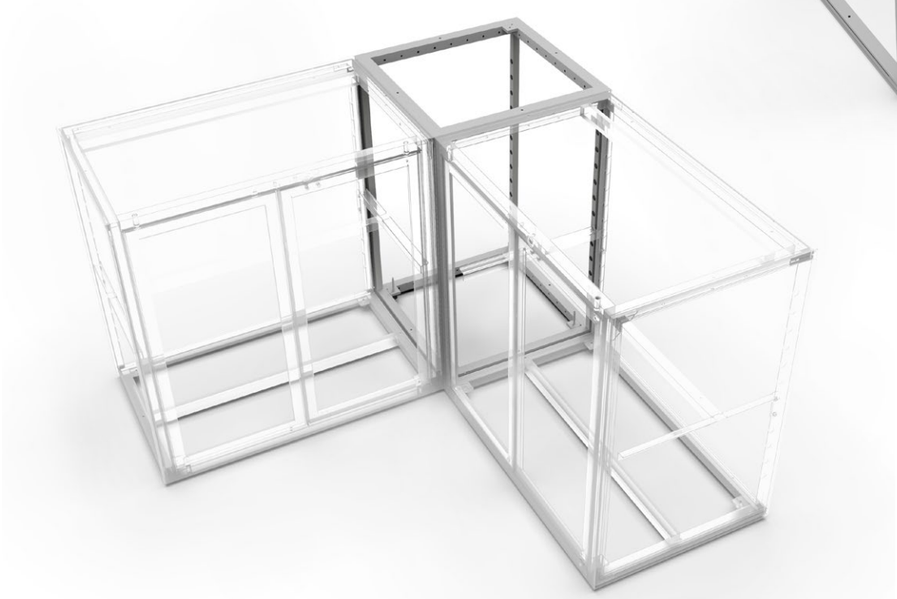


Back

iZi-bar Corner

Add an **iZi-bar Corner** to elongate your bar or create that perfect corner look!

DIMENSIONS: 620 X 620 X 992 MM
STANDARD FINISH: RAL 9006 TEC

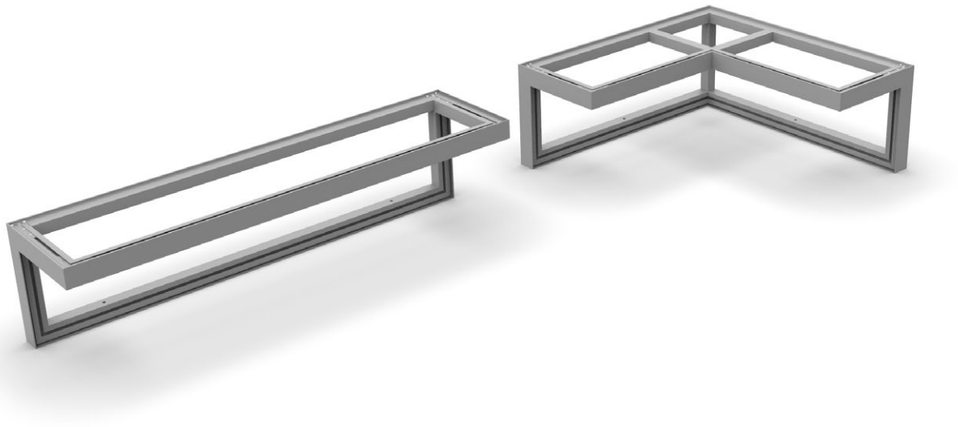


The iZi-bar Corner can also be used as a stand-alone display.

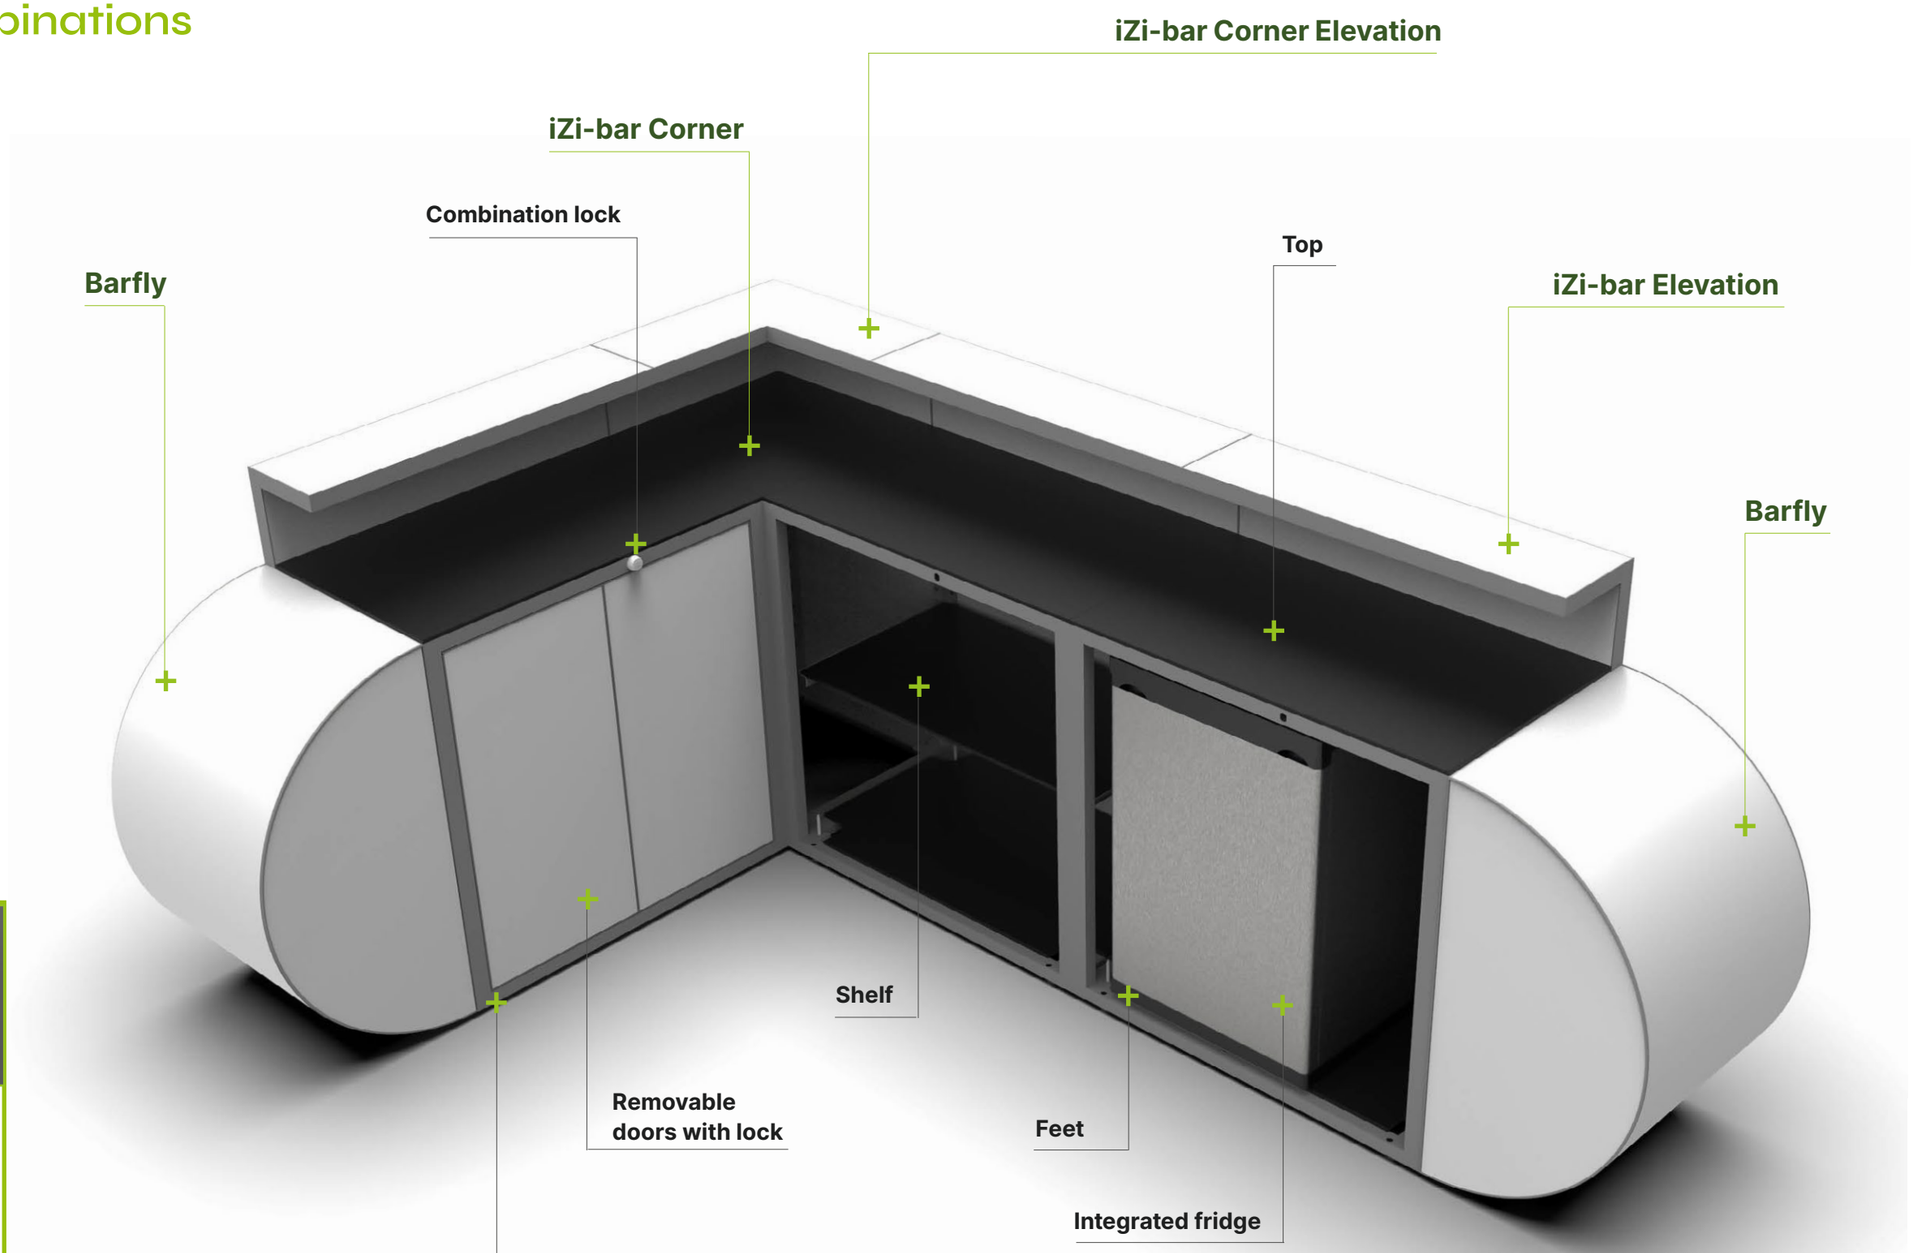
iZi-bar Elevation

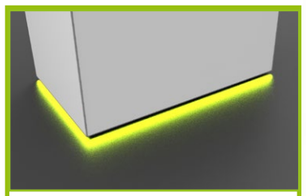
Why not turn the iZi-bar into an out-of-view piece of furniture? Thanks to the **iZi-bar Elevation**, now you can! The iZi bar elevation is a handy add-on that is also available in a corner option to match the iZi-bar Corner. What a great way to give the look of iZi-bar a total overhaul!

DIMENSIONS ELEVATION: 248 X 992 MM
DIMENSIONS CORNER ELEVATION: 620 X 620 X 248 MM
STANDARD FINISH: RAL 9006 TEC



Endless combinations



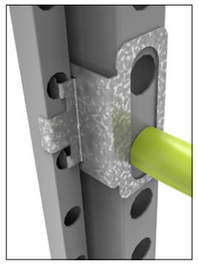


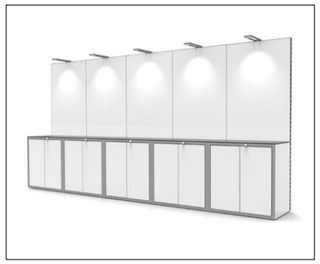
Tip: why not install an indirect light strip around the bar for that floating effect

Accessories

f31 - b62 connector

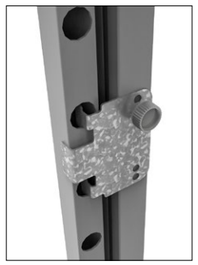
This connector allows you to easily connect your b62 frames to the iZi-bar opening up more options to create totally different kinds of furniture or displays.

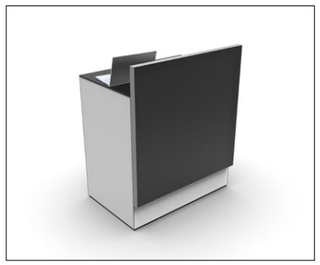




f31 - b42 connector

The f31-b42 connector enables you to easily connect any special shape in the b42 range to the iZi-bar.





Universal f31 connector

Using our universal connectors, you can add several elements to the iZi-bar, such as a lightbox or bar element. A fantastic way to customize your bar!

iZi-range connector

This connector can be used to connect multiple iZi elements (iZi-bars, iZi-bar elements) simply and easily.

Displays

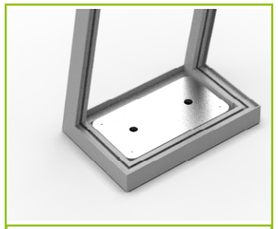
iZi-tablet holder

A timeless display

Not only does the iZi-tablet holder stand out because of its **minimalist look, it also provides space for cables and security accessories thanks to its savvy design**. The back is covered by a foam protector that keeps your tablet firmly in place. The iZi-tablet holder immediately adds allure to any design.

DIMENSIONS: 240 X 1155 X 362 MM
STANDARD FINISH: RAL 9006 TEC

Foam protection



Tip: The plate with screw holes at the base of the display makes it possible to secure the iZi-tabllet holder onto a raised floor.

Infill

Give your iZi-tablet holder any look you'd like. Does your client need printed dibond or a plain forex panel? Anything is possible!

Lightscreen

Small, medium and large

There is no end to the creative ways in which you can use our lightboxes. From a perfectly aligned lightbox and frame for a flawless minimalist look, to a unique combination of lightboxes in all shapes and sizes, for a fabulous eye-catching 3D effect. **Easily mount the sideLED lightboxes onto the beMatrix frame system** using large holes, or just use them as a free-standing item. The lightscreens are available in stock, but custom options are available on request.

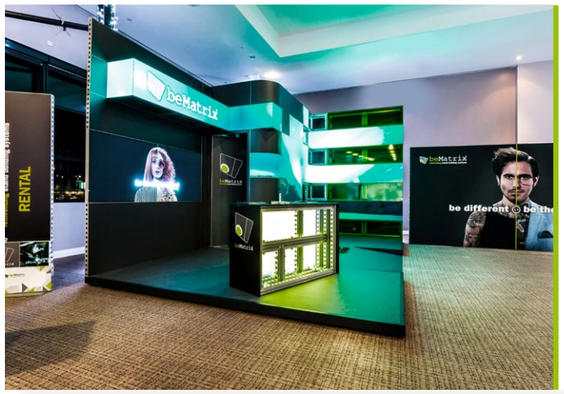
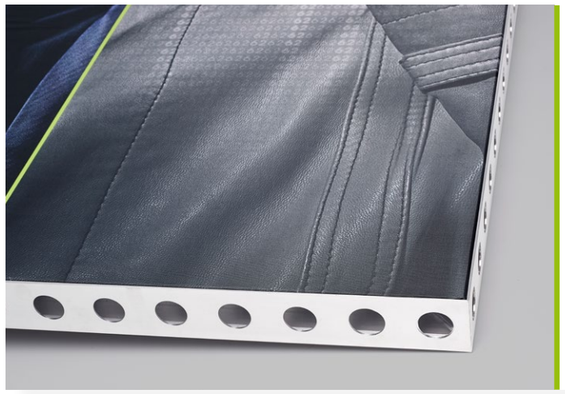
The 8 beMatrix principles



Quality guaranteed

All beMatrix frames are manufactured in-house, so we are in control of every step in the production process. Continuous optimization and innovation initiatives ensure the system always meets the market's demands.



Finishing options

The beMatrix system comes with a large range of tools and accessories to help you finish your booth exactly the way you envisioned. With hard panel or textile infills, you can even hide the entire frame system so it becomes invisible to the eye.

Freedom to design

beMatrix combines the benefits of a modular system with the possibilities of a custom solution. Almost any shape, contour or design is conceivable and can easily be created. One single frame allows you to create many different kinds of design concepts.

Lightweight

The aluminum frame system is lightweight making it ergonomic and eco-friendly. This lightweight design makes it easy for the exhibit or event builder to move frames and keep CO2 emissions low during shipping or transport.

Fast

Assembly and disassembly of the beMatrix system is quick and easy. Its lightweight, simplicity and tool free assembly save loads of time, leaving you free to focus on the finishing details of your booth.

Long life cycle

The system is extremely sturdy, making it endlessly reusable. Wear and tear won't shorten its lifespan, since the frame is not visible to the eye once the entire design is set up and infills are added.

Ecologically sustainable

Because of its low weight, long life cycle and modular character, the beMatrix frame system is the most eco-friendly system on the market today. Moreover, it is made out of untreated aluminum, making it 100% recyclable and reusable without any loss in quality.

International network

The bePartner network brings together real ambassadors of the beMatrix frame system, each with their own expertise. bePartners are vetted annually giving you peace of mind.
