Technological development never stops at beMatrix. We offer lighting solutions that are easy and quick to install.

Our smart lighting solutions include **accent, atmosphere and general lighting**. These solutions can be used for different applications including booths of varying size, showrooms, pop-ups and within the retail sector.

SAM Light

Accent lighting

Would you like to draw attention to a specific part of your booth? Illuminating panels, walls and/or products is easy with the SAM Light.

This **adjustable LED lamp** has a sleek, stylish design, and various mounting options. Up to 6 SAM Lights can be installed on one power supply (160W).

2 in 1

SAM Light is a "2-in-1" light, meaning you can switch from cold to warm light with one simple switch. Switching is easy and can be adjusted anytime.

Moveable headlight

The integrated LED lights are 340° adjustable. This means any surface can be illuminated at any desired angle, including upwards!

ART. NR: 250 05 50 S
DIMENSION: 430x100x20 MM
WEIGHT: 0.8 KG
LUMINOUS FLUX: 1200 LM
COLOR TEMPERATURE: 3500 K / 5000 K
ELECTRICAL CONSUMPTION: 15 W

BIG SAM Light

Bigger lighting options

The BIG SAM Light is the perfect solution for even illumination of large surfaces. The adjustable LED light gives you **maximum flexibility** being able to rotate 340° letting you mount it at the top of a structure, as well as below.

The power supply is integrated into the light, so no more trying to hide the power supply within your design. You can connect the light directly to 110 or 220V power. Additionally, the power cables have a security lock to prevent disconnecting. The light also has a breaker that shuts down the light and can be reset should the current exceed the maximum limit.

Connectable lights

It is possible to connect up to 20 BIG SAM lights on one power supply, using the extension cables that come with the lights.

3 in 1

Big SAM is a “3-in-1” light, meaning you can easily switch between three color temperatures: cold, neutral and warm. This gives you the opportunity to adjust the light to the atmosphere you want to create.

Track Light System

Using standard lights in the exhibit and event industry, means dealing with cables. They look untidy and are not always easy to hide. To help solve this we are happy to present the Track Light System. A “beMatrixified” solution that can be used in all your beMatrix designs! There is no better way to add adjustable and seamless lighting to your setup, than with the Track Light System from beMatrix.

Fast integration

beMatrix developed a **square 62×62 profile** that matches with the existing EUTRAC profile*. This Track Light profile integrates quickly and easily within our modular b62 frame system.

The Track Light System can be incorporated into your design in a variety of ways. Thanks to the modular DNA, the possibilities are endless. Mount the profile in a ceiling, on top of a wall, flush mounted within a frame, in a banner, or as a stand-alone lighting pole on a baseplate.

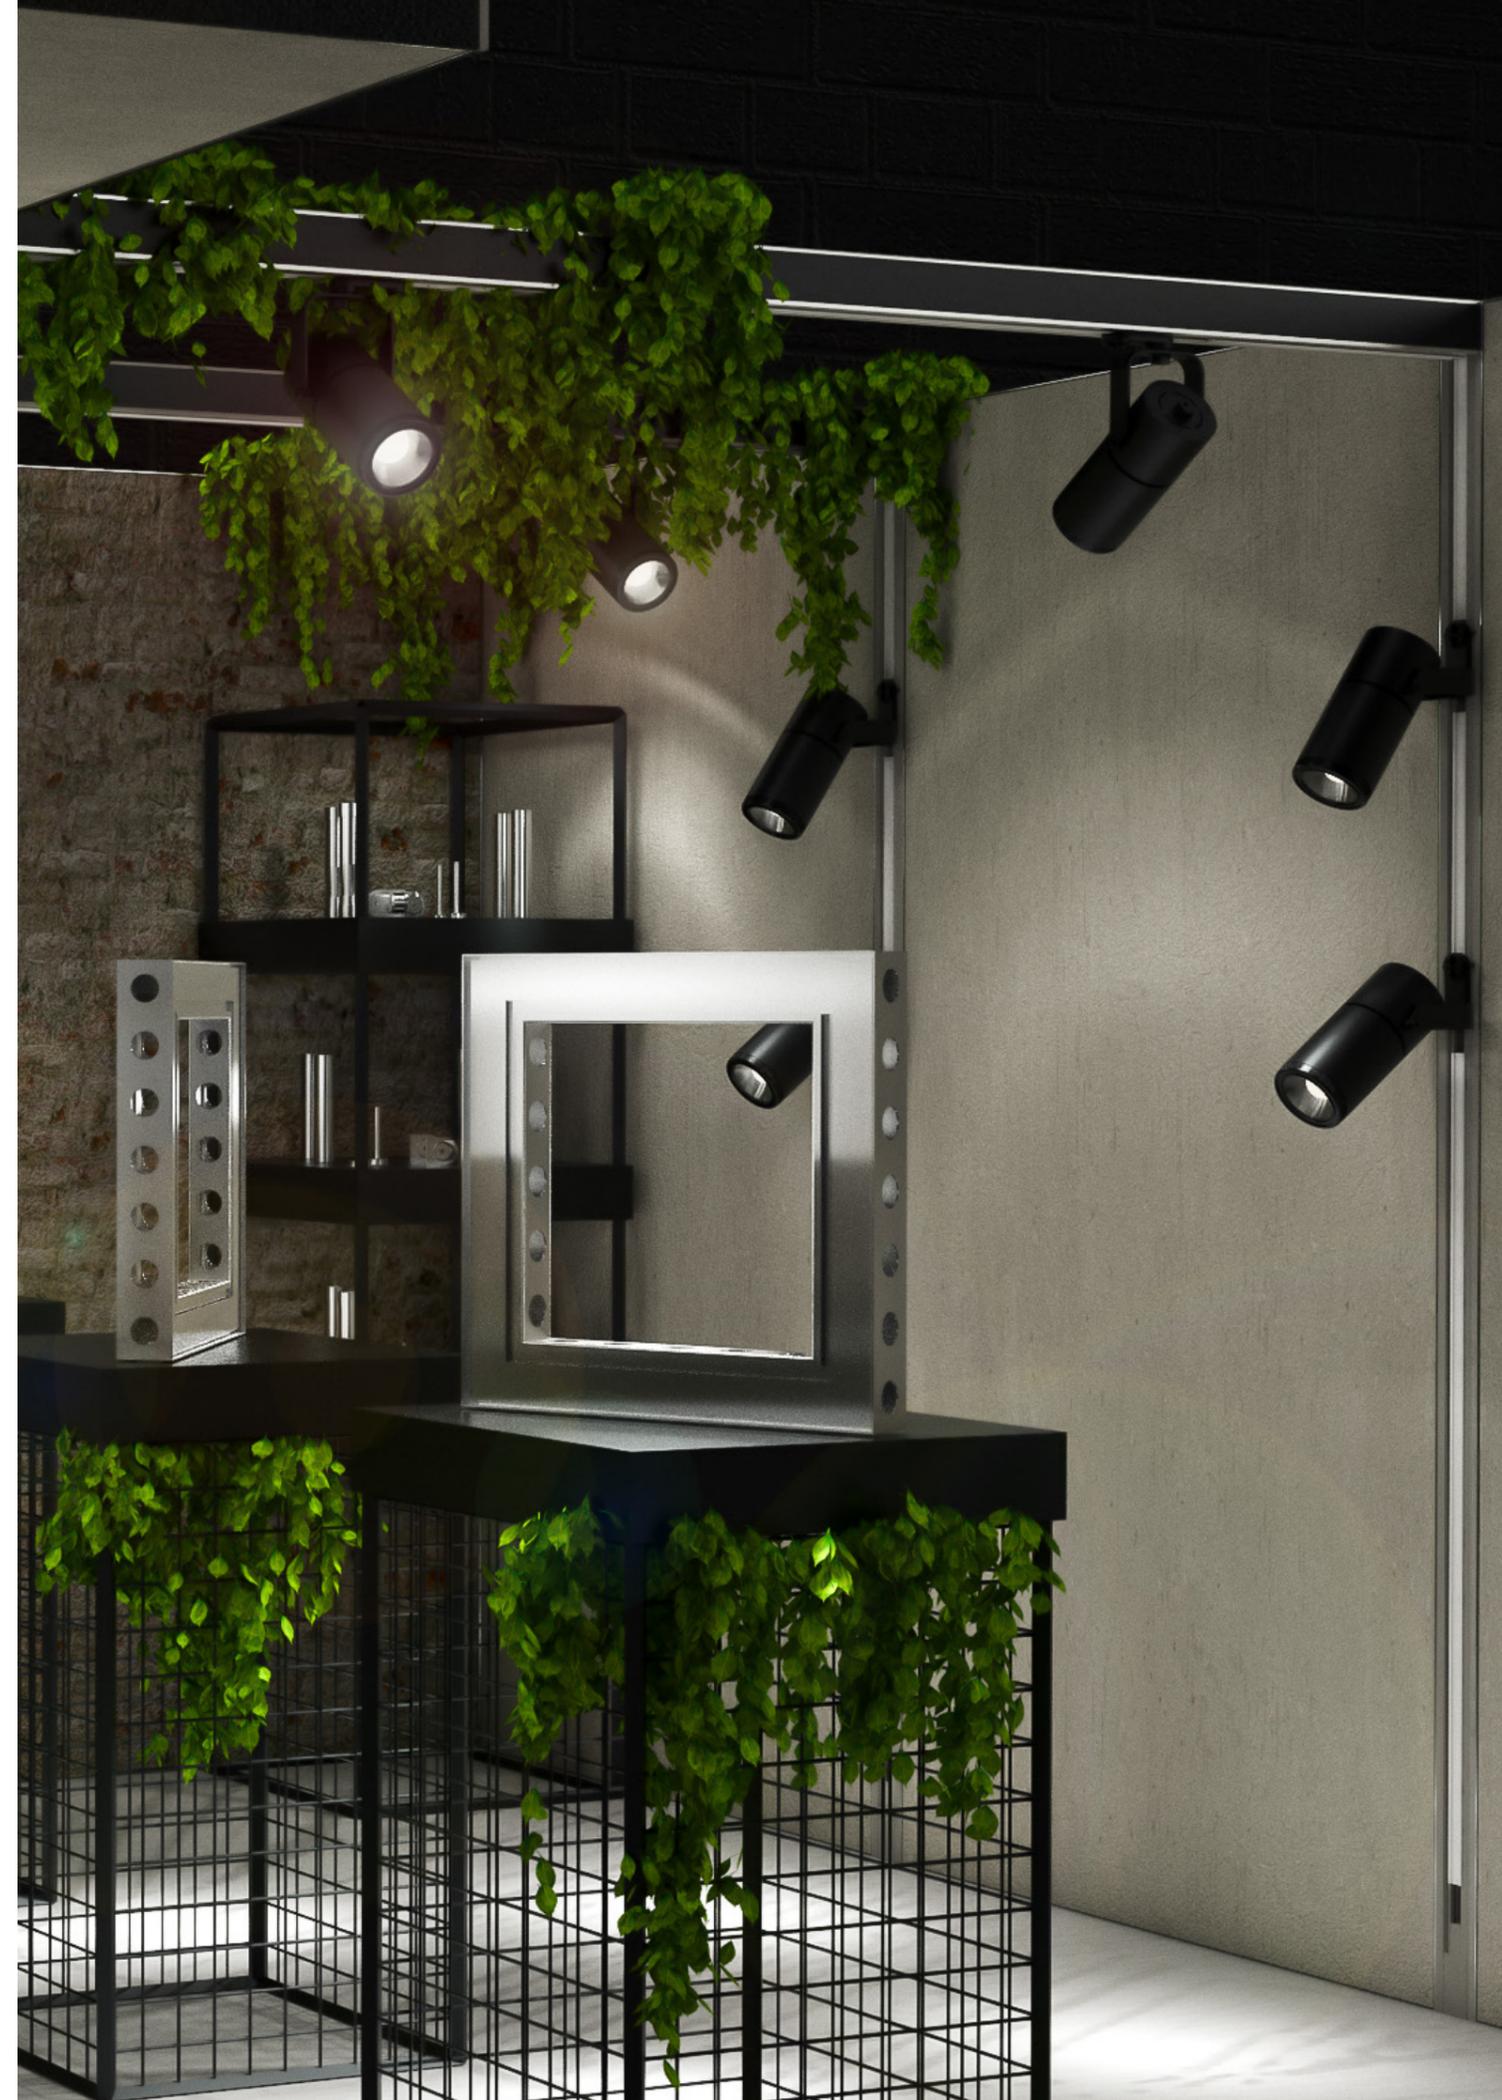

Track Light integrated into ceiling

Seamless & custom finish

For a sleek result, the Track Light System can be finished with panels on three sides. The Track Light System is compatible with existing track lights.

Integration as a banner

Lighting pole on a baseplate

Integration in a wall

Lightbox

No boundaries to your creativity

There is no end to the creative ways in which you can use our lightboxes. From a perfectly aligned lightbox and frame, to a unique combination of a lightboxes for a fabulous and **eye-catching 3D effect**.

Single or double sided lightbox

The sideLED lightboxes are **easy to mount** onto the beMatrix frame system.

Single sided		Double sided
		
62S sideLED lightbox To ensure the stability of the frame we advise a maximum dimension of 992 × 2976 mm. If there is extra support from the surrounding frames, your construction can go up to 1488 × 2976 mm.	124S sideLED lightbox	186D sideLED lightbox

beMatrix

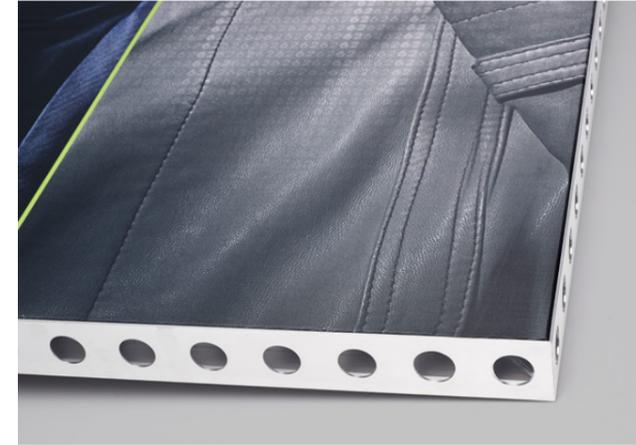

The 8 beMatrix principles

Quality guaranteed

All beMatrix frames are manufactured in-house, so we are in control of every step of the production process. Continuous optimization and innovation initiatives ensure the system always complies with the market's demands.

Top finishing

The beMatrix system comes with a large range of tools and accessories to finish your exhibit or event exactly the way you want. With infills, you can even hide the entire frame system so it becomes invisible to the eye. Thanks to our 'seamless' concept, not one seam will be noticeable.

Freedom to design

A design built with beMatrix combines the benefits of a modular system with the possibilities of a made-to-measure solutions. Almost any shape, contour and construction is possible and can easily be created. One single frame allows you to create all different kinds of design concepts.

Lightweight

The aluminum frame system is lightweight, ergonomic and eco-friendly. With our system, your transportation costs and CO2 emissions remain low.

Fast

Assembly and disassembly of the beMatrix system takes hardly any time. Its lightweight, simplicity and tool free assembly save loads of time, leaving you space to focus on the finishing details of your design.

Long life cycle

The system is extremely sturdy, making it endlessly reusable. Wear and tear won't shorten its life cycle, since the frame is not visible to the eye once the entire design is set up.

Ecologically sound

Because of its low weight, long life cycle and modular character, the beMatrix frame system is the eco-friendliest system today. Moreover, it is made out of untreated aluminum and is 100% recyclable and reusable without any quality losses.

be strong  **be stylish**
be anything.
